PROFESSIONAL SUMMARY

Results-driven **Software Development Engineer** with 2.5 years of experience building and scaling enterprise-grade backend systems at Phenom. Proven track record of architecting microservices, designing resilient integration frameworks, and delivering high-impact solutions. Proficient in **Java**, **Spring Boot**, with hands-on experience in observability, DevOps pipelines, and AI-assisted development tooling. Passionate about writing clean, reusable code and driving operational excellence across distributed systems.

PROFESSIONAL EXPERIENCE

Phenom

Hyderabad, India

Software Development Engineer – II

Feb 2026 – Present

- Architected, developed, and deployed a **Workflow Engine microservice** from scratch using **Temporal**, orchestrating **100K+ workflow executions annually** and providing a scalable platform for long-running, event-driven business processes.
- Refactored duplicated code across microservices into a centralized **utils-package** and migrated the services to a **Maven multi-module project**, improving code reusability, reducing redundancy, and streamlining dependency management.
- Automated Weekly Business Review (WBR) metrics aggregation, reducing manual reporting effort by **66%** (90 min → 30 min) and enabling near-real-time integrity checks for SLI monitoring.
- Contributed to **FedRAMP** readiness by remediating security findings, enforcing secure coding practices, and implementing compliance-driven enhancements across enterprise microservices.

Phenom

Hyderabad, India

Software Development Engineer – I

May 2024 – Jan 2026

- Owned the delivery of enterprise offer-management integrations with **Adobe Sign** and **DocuSign**, building a resilient resync framework for offers, documents, and status updates that processed **50K+ transactions annually** and reduced support escalations by **~40%**.
- Designed and delivered configurable offer-letter branding capabilities, enabling recruiters to dynamically customize headers and footers across **20+ enterprise tenants**, improving customer onboarding and adoption.
- Architected and delivered end-to-end integrations with **Universal** and **Leegality**, automating candidate screening workflows for **25+ enterprise customers** in the US region and reducing manual processing effort by **~70%**.
- Improved operational excellence by implementing automated **Slack-based alerting** across **10+ microservices** for production failures, workflow exceptions, and critical business events, reducing incident detection time by **~60%** and accelerating root-cause analysis.

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript, Python

Frameworks & Libraries: Spring Boot, Spring Data JPA, Spring Security, React.js

API & Architecture: REST APIs, Microservices, Microfrontends, Object Oriented Programming (OOPS), Design Patterns

Databases & Caching: MongoDB, Postgresql, Redis

Workflow Orchestration & Messaging: Temporal Sdk, Kafka

Cloud, DevOps & Infra: Git, AWS (EC2, S3), Docker, Jenkins, Helm Charts

Observability & Monitoring: Grafana, Slack Alerting

AI & DevTools: Cursor, Kiro (Specs, Skills, Hooks), MCP, Chrome Dev Tools, Postman

EDUCATION

Gayatri Vidya Parishad College of Engineering (A)

Visakhapatnam, India

Bachelor of Technology in Computer Science and Engineering

2020 – 2024

- CGPA: **9.3 / 10**

ACHIEVEMENTS

Open Source Contributor – Contributed to **20+ open-source repositories**, collaborating with developers across diverse projects to deliver feature enhancements, resolve bugs, and improve overall code quality.

Codeforces (Nitin7) – Achieved a rating of **1100+**.
